Allowable Subject Matter

Claims 47-84 allowed.

The closest relevant art is Wells (5,509,853) wherein Wells teaches a system for removing a pollutant from a roadway comprising a vehicle (17), a pollution trap (12) mounted on the vehicle such that a surface of the pollution trap (12) is exposed to a roadway pollutant (see Fig. 2). The pollutant trap (12) comprises a housing (14) mounted on the underside of the vehicle (17). The vehicle (17) comprises a plurality of wheels (19) and a pollutant liberator which is a fan or blower (see Fig. 3). Wells further teaches the pollution trap (12) can be mounted atop of vehicle's roof, or under, or in front of, to the sides of, or behind a vehicle, or within or upon a vehicle's bed, open or exposed to the ambient air of the atmosphere about it (see col. 3, line 61 through col. 4, line 7). Claims 47-84, as amended, differ from the disclosure of Wells in that an element comprises a material configured to retain roadway pollutant particles that are 10 microns or less that are liberated from the roadway by a tire of the vehicle wherein the element is affixed to the vehicle at a location that receives a spray of liberated roadway pollutant particles.
